DAYS LONGER

COMPANY PROFILE

Acemco s.a.l was established in 1972 by Mr. Mohammad Meskaoui as the exclusive distribution of Coleman Air Conditioning products. The company grew to become one of the leading names in heating and air conditioning in Lebanon, with several worldwide exclusivities as well as a reputable installation team and a highly-satisfactory maintenance service.

In 2002, Acemco started to expand its activities towards the Middle East and Africa by focusing on distribution of HVAC products to multiple destinations.

In 2010, Acemco started a new journey into renewable energy which was still a new field in Lebanon and in the region, by launching the renewable energy department focusing on Photovoltaic systems, LED lighting and solar street lighting. Acemco established several partnerships with eminent European manufacturers, namely Geo-Technik in Germany and Mprime in Portugal.

Today, with the technical support of its valuable partners and their expertise in the photovoltaic market worldwide, Acemco is striving and succeeding to offer high caliber European photovoltaic systems to its clients with the best warranties in the market. Acemco's dedicated design team can manage all types of projects with the support of a professional team of installers primed to undertake any project size.

The continuous satisfaction of clients is the utmost priority of the company, no matter how far it expands and grows.

SOLSTICE SPG HOW IT WORKS

The Solstice Solar Power Generator was exclusively created for the Lebanese market taking into consideration all the challenges and difficulties of electricity in Lebanon. This system was conceived to eliminate the fuel generators and to present a complete and affordable solution for the Lebanese household. This system delivers power during cut-offs in all weather conditions, and is equipped with a smart technology that will allow you to have back-up power whenever you need it. The Solstice can also be combined with net-metering to reduce your electricity bill. It eliminates the need for a generator and all its problems.

ADVANTAGES

- ⚡ Eliminates the need for a generator subscription
- ⚡ 0% interest loan up to 10 years
- ⚡ 24/7 electricity in all weather conditions
- ⚡ Ecological, green product
- ⚡ Reduces electricity bill
- ⚡ Quiet operation
- ⚡ No pollution
- ⚡ Maintenance free
- ⚡ Lifetime 25 years
- ⚡ Made in Germany and Portugal
